Quench

Quench × THE OCEAN CLEANUP

By choosing us you will supporting the largest clean up in history.

The Ocean Cleanup is a non-profit organisation developing and scaling technologies to rid the oceans of plastic. Quench donates & supports the Ocean Clean Up.

Why Choose Quench?

Quench your thirst with the UK's favourite! Fresh, filtered, drinking water that cuts costs, supports sustainability, and promotes a healthier living.

When you choose Quench, you benefit from:

- Refreshments you'll love to drink
- Superior water & hot beverage dispensers
- Advanced filtration technology
- Solutions tailored to your business
- Robust warranties

Our solutions are designed for workplaces of all sizes:

Schools & Universities
Keep students and staff hydrated with small and large water fountains.

Shopping Centres
The perfect hydration solutions for high traffic areas.

Hospitality & Hotels
Rapid, reliable hot or cold hydration for customers and staff.

Gyms & Leisure
Built for on the go hydration for busy environments.

Factories & Warehouses
Reduce downtime & keep large workforces hydrated with ease.

Offices & Workplaces
Keeping your workplaces§ hydrated with indoor water dispensers & coffee machines.

Quench | Water Boilers

Experience The Perfect Brew.

Every time.

Say Goodbye to the Wait.

Say Hello to InstantBrew!

In today's fast paced workplace, every minute counts! The familiar "kettle run" may be part of office routine but the time lost waiting for water to boil and the energy wasted repeatedly re-boiling throughout the day can quietly impact productivity and costs.

Our solution helps teams save time, reduce energy waste and enjoy instant access to hot water whenever they need it.

The Quench Solution

Our range of professional hot water boilers provides an endless supply of filtered, boiling water at the touch of a tap. Plumbed directly into your mains supply, these units use advanced staged-boiling technology to ensure that even during the morning rush, every cup is served at the perfect temperature. Perfect for offices, cafés and other busy environments.

See The Boilers In Action

UP TO **50%** ENERGY SAVINGS

Your kettle costs each user 15 minutes a day on average. Get instant hot water and instant savings with InstantBrew!

The Quench Advantage

Staged Boiling Process
Water is heated progressively rather than boiling a single tank of cold water at once, saving energy and running costs.

Eco Mode
Lower your utility bills using the programmable timer and eco-mode, preventing energy waste during evening and weekend hours.

Space-Saving Design
Ultra-slim footprint fits any countertop, making it the perfect solution for compact kitchenettes or break rooms.

Auto Fill
Designed for convenience, our boilers automatically refills from the mains supply, guaranteeing water is always available on demand.

Anti Fingerprint Coating
Maintain a professional appearance by preventing greasy marks and reducing the need for frequent cleaning.

Smart Temperature Control
Features a digital interface with real-time temperature tracking, the system uses staged boiling to ensure consistent hot water, even under heavy demand.

Instant Brew CT10

Upgrade your office, staff room, cafe, or restaurant with the Quench countertop boiler. Featuring a slimline design to suit even the tightest counter spaces, this plumbed-in unit removes the need for a kettle by delivering up to 135 cups of boiling water per hour. Advanced staged-boiling technology ensures every cup is served at the perfect temperature, even during periods of heavy use.

Quench Countertop Boilers Features

Fully Programmable
Control when your hot water boiler is on using the easy to use digital programmer. Set opening and closing hours to ensure hot water is always available from the minute you open.

Smart Temperature Control
The digital interface provides real-time temperature tracking and manages staged boiling to keep water boiling hot even under heavy use.

Space-Saving Design
The ultra-slim footprint fits any countertop, making it the perfect solution for compact kitchenettes or breakrooms.

Safety Guaranteed
Protect your team with a lockable anti-scald tap, non-slip rubber feet, and heat-resistant construction.

Autofill
Water automatically gets added to the boiler from your mains supply.

Instant Brew CT12

Backed by all the same specifications as the CT10 & CT20, the InstantBrew CT12 is the perfect compact boiling water solution. Designed with a slim 18cm depth, this wall-hugging profile sits flush to the wall to free up valuable worktop space without sacrificing capacity. Plumbed directly into your mains supply, it uses advanced staged-boiling technology to deliver continuous on-demand boiling water at the ideal temperature. Eliminating kettle clutter and saving space in busy office kitchens.

Premium & Durable Build

Constructed from 304 food-grade stainless steel with a slim 180mm profile, available in brushed steel or a sleek black finish to suit any décor.

Energy-Saving Intelligence

Minimise heat loss with the 12L double-insulated tank and reduce overheads using the programmable timer and integrated eco-mode.

Indoor & Outdoor Hydration

Ambient or Chilled

Introducing the Explore Connect Range: Featuring the classic Explore Connect and the multi-function Explore Hybrid Connect. Each of these anti-vandal stainless steel dispensers come with the option for ambient or chilled water delivery, as well as seamless ChillHub compatibility.

Optional Built-in Chiller

High-capacity built-in water chiller to deliver instant, ice-cold hydration alongside standard ambient water. Supplying up to 30 litres of chilled water per hour, it effortlessly handles peak rush times in high-traffic commercial spaces.

Universal Accessibility

The streamlined, space-saving design is fully ADA-compliant, ensuring easy access for all users in any outdoor setting.

Space-Saving Efficiency

The consolidated, wall-mounted design provides essential hydration without obstructing high-traffic walkways or narrow corridors.

Vandal-Proof Engineering

Equipped with a one-piece anti-theft bubbler and reinforced manual push-button activation to ensure peace of mind in unsupervised outdoor areas.

Seamless ChillHub Compatibility.

What does this mean? It means complete installation freedom! You can enjoy perfectly chilled or ambient water indoors, or refresh with ambient water outdoors.

Want chilled water in your outdoor space? Simply connect a ChillHub unit indoors to unlock chilled water delivery outside.

Turn any ambient dispenser into chilled water.

Chilled Water

WC-Q-UCWC

Chill Hub

The Chill Hub is a high performance chiller with direct chill technology, designed to provide refreshingly chilled water on demand. With an impressive 30 litres per hour cooling capacity, a single Chill hub can supply up to two bottle filling stations or water dispensers simultaneously, making it an efficient central cooling solution for multiple locations.

Features

- Mains-fed Water
- 2x Water Outputs
- Stainless Steel
- Direct Chill Technology

Direct Chill Technology
Passes mains water directly through a sealed coil or pressure vessel to cool it instantly on demand, unlike reservoir systems that store standing water in a tank.

Chill Hub Features:

Quiet Operation
Sealed compressor operates with low noise and vibration levels. Perfect for offices and residential spaces.

Space-Saving Design
Designed to go under countertops or in cupboards, staying out of sight, not on and saving valuable countertop space.

Power Multiple Bottle Stations

Ambient to Chilled

Engineered to serve as a high-performance central hub, capable of powering up to two additional bottle filling stations simultaneously. By leveraging its 30L per hour cooling capacity, you can extend chilled water access across multiple nearby points from a single unit.

Chill Multiple Dispensers
Compatible with any Quench ambient water dispenser, the Chill Hub transforms standard ambient units into chilled water dispensers.

Offer More
Turn any existing ambient water supply into chilled cold water.

Invest in reliable hydration today, with the reassurance of expert support whenever you need it!

Your Quench water dispenser is an investment in the staff wellbeing, productivity and satisfaction. Our comprehensive aftercare package is designed to protect that investment, ensuring your water dispenser continues to deliver exceptional performance reliability and quality hydration every day.

With nationwide coverage, expert engineer support and proactive servicing, we help prevent unexpected issues, reduce disruption and extend the lifespan of your equipment. Our dedicated customer care team is always on hand to provide fast, professional assistance whenever you need it.

Rated Excellent

Exceptional Support When We Needed It Most

I am writing on behalf of everyone at our Residential Care Home to express our sincere and heartfelt thanks to the team at Quench for the incredible support provided during our recent emergency. When we found ourselves in urgent need of water, your swift response and willingness to assist made an immediate and meaningful difference. Your team quite literally came to our rescue, ensuring that the well-being, comfort, and safety of our residents and staff were maintained at a very challenging time. Acts of kindness and professionalism such as yours do not go unnoticed. Thank you again for your **outstanding support.**
